AN ENVIRONMENTAL
COMMITMENT

PARASOLS wongleon®

French parasols manufacturer since 1950.

*For HORECA, the secret of Vosges Company Parasols Wongleon's success can be summed up in tree words : **robustness et outstanding usability.***

Through its know-how and the excellence of its products, Parasols WONGLEON, a market umbrellas compagny founded by Désiré WONGLEON, has been able to evolve to offer you a wide range of modern and high-end parasols.

French elegance, robustness and technology are our maxims.

Parasols WONGLEON compagny domiciled Zone Inova 3000 in Thaon-Les-Vosges (88) on 14000m² of land including 4000m² of production and commercialisation building.

For 70 years now, without any noisy publicity, Parasols Wongleon's parasols shades its main competitors.

In all weathers!

OUR EXPERTISE

Since its creation in 1950, our company has provided a know-how tradition that continues to evolve to meet the needs of professionals, individuals, businesses and communities today..

OUR VALUES

Proximity, reactivity, innovation, respect for the environnement.

OUR MISSION

Find ingenious and innovating ideas to make easier your everyday life and to anticipate your needs.

OUR AMBITION

Award-winning service and products that enable our customers to progress in their business and guarantee them ever safer, more efficient and more environmentally-friendly solutions.

SENEST
PARASOLS CHR

Our brand SENESEST which can draw on decades of expertise has specialized in custom made HORE-CA parasols.

AN ENVIRONNEMENTAL COMMITMENT

The ambition with Senest is to shape and prepare future.

We are committed to work with robust high quality and repairable materials in due respect for our ecosystem.

Concerned about the future of our planet, we offer recyclable aluminum products, intended to be sustainable over time et our fabrics are labeled OEKO TEX STANDARD 100.

Furthermore, as part of our commitment, we print our fabrics with solvent-free inks.

A CULTURE OF CONSTANT INNOVATION

SENESEST is a brand driven by the desire of his CEO to advance, to progress and to innovate in order to offer more effective and more environnementally friendly products.

To leave our confort zone, to challenge the teams, to find ingenious ideas to make everyday life so much easier and to anticipate your needs, such is our daily team's mission.

A CUSTOM MADE QUALITY

Every frames are machined in-house pieces by pieces to ensure robustness and maximale durability. Our canopies are hand-made with great care.

FABRICS

Fabric canopy is a key part of the parasol which have to resist to everyday use. That's why we choose high-quality and resistant fabrics. It's also a key part to create a coherent concept to add natural charm to your outdoor spaces .

OPTIMAL PROTECTION

In a climat change context and to take care of you and your client's skin, our fabrics protect from UV. It also provides a high degree of insulation from heat and our Tech-Acryl range (SENEST exclusivity) ensures a high-end thermal control under the parasol thanks to its thermal insulation properties.

PREMIUM QUALITY

Our mass dyed fabrics have a good colour stability and a high tensile an tear strenth.

TECHACRYL

We have created an revolutionary fabric tailored to meet the demanding needs of our HORECA clients, calling for a greater thermal protection on terraces very exposed to the sun. Techacryl fabric is the result of our research combined with our expertise.

It is composed of acrylic (face) and polyester (back).

Techacryl blends the best of both fabrics to offer you a lightweight, durable, insulating, and **100% waterproof material**.

A FABRIC THAT BRINGS YOU COMFORT

This fabric is particularly suitable for environments with challenging weather conditions. As the fabric is 100% waterproof, you can continue to use your terrace in inclement weather (by accessorizing with our gutters and surrounding curtains). An extremely advantageous investment to increase seating capacity and revenue.

Its superior insulating power unrivaled to date in sun protection ensures a lower radiant temperature under the parasol. An important advantage for your customers in a context of climate change.

In summer and winter alike, our fabric will provide unparalleled comfort.

OUR INNOVATION ADVANTAGE

Techacryl technology allows for combining two colors of fabric for your parasol, one color on the inside and a different color on the outside.

We also offer the option to print and customize the interior of your parasol to create a cocoon for your customers (see p.11 of our catalog).

TECHNICAL SPECIFICATIONS

Composition: 60% mass-dyed acrylic, 28% polyester, 12% PU

Weave: Canvas/micro

Weight: 350g/m²

Chain Breaking Strength: 190daN

ACRYLIC

The fabrics we use set the standard for sun protection. Over time, they ensure excellent protection against UV rays, heat, brightness, and inclement weather.

The mass-dyed acrylic fiber and the special treatment for outdoor blinds provide long-lasting color retention, good resistance to water, tears, and dirt.

Our fabrics are EOKO-TEX certified, guaranteeing the absence of toxic and harmful substances for both human health and the environment (or concentrations too low to pose a confirmed risk).

CUSTOMIZATION

To help you stand out and enhance your umbrellas, we offer the option to personalize them by adding your company logo or a catchy phrase. Printing can be done on the triangles and/or valances.

PRINTING METHODS

- HEAT TRANSFER-FLOCKING OR DTF
Your design is digitally printed and then cut. A heat press is used to transfer it onto the target surface/
- SUBLIMATION
By transitioning from a solid to a gaseous state, colored pigments are deposited onto a specific substrate. This technique is ideal for a total covering. We use environmentally friendly solvent-free inks.

CUSTOMIZABLE FABRIC

With our new Techacryl fabric, we offer you the opportunity to customize the canopy of your umbrella with patterns of your choice.

We sublimately print the polyester side of the fabric, which is on the inside of your umbrella, for longer color retention. Indeed, the interior of the fabric is not exposed to direct UV rays and is not subject to moonlight. The brilliance of the colors is thus preserved for a longer duration. Your imagination is our only limit of customization....

PARASOLS

To fully enjoy your outdoor spaces, it is important to have a suitable sunshade solution. We offer you a wide range of umbrellas in various shapes, sizes, and colors. Whether round, square, or rectangular, small or giant, center-pole or offset, you will surely find the umbrella that suits your project in our catalog.

Before making your choice, analyze the space where your umbrellas will be installed. The type of space, available surface, weather conditions, nature of the ground, and frequency of use are all factors to consider in choosing the model and its installation.

All our models are crafted with robust and high-quality materials, perfectly suited for professional use.

We manufacture all components of our frames in our workshops, allowing us to extend the lifespan of your umbrella through repairs.

BASES

To ensure the safety of your shaded space and facilitate the handling of umbrellas, we offer various types of bases suitable for the different models of umbrellas in this catalog.

Our steel bases undergo a hot-dip galvanizing treatment to prevent rust, which may alter the visual appearance but does not compromise the quality of the material.

MAINTENANCE TIPS

Short time ago, parasol brings some degree of comfort during those chilly winter breaks. But the cold and damp have now set in and it's time for it to be stored. It's important to follow some preventive cleaning rules before winter storage.

CANVAS CARE

Before storing, clean your canvas with a soft brush to remove any dirt. If stains persist, use lukewarm water and, if necessary, a mild detergent, always scrubbing in a circular motion with a soft brush. Rinse with clean water and leave to dry. The fabric must be dry before folding.

FRAME CARE

Wipe your aluminium or stainless steel frame with a damp cloth, then dry with a soft cloth.

STORING THE PARASOL

if you're storing your parasols outside, to protect them from the elements. Ideally, store them upright.

Thanks to our advice, your parasols will keep all their splendour and elegance for the arrival of the first rays of spring sunshine.
